

# LABSTATS 101

## GROUPS

🕒 Create groups immediately after deployment.

### BEST PRACTICES

Create groups based on physical locations to improve discoverability and fine tune reporting.

### HOW TO CREATE A GROUP

- 1 Navigate to Stations, then click Groups.
- 2 Click Create Group.
- 3 Enter information to create the new group.

**Name:** *The name of the group.*

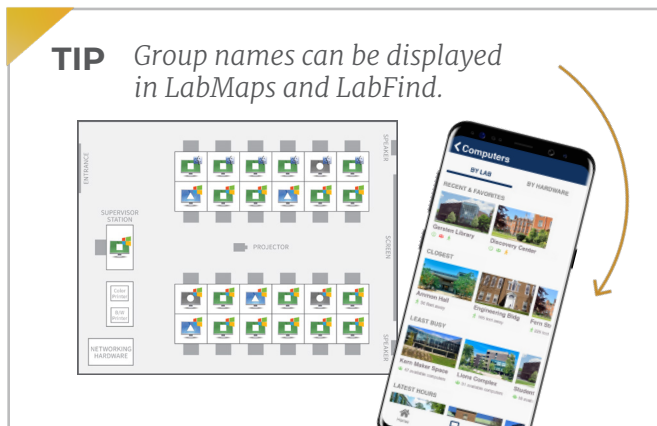

**Description:** *A brief description about the group.*

**Create In:** *Shows the parent group or root if no parent.*

**Contents:** *Choose whether the group will contain groups or stations. You can add subgroups or stations after you save.*

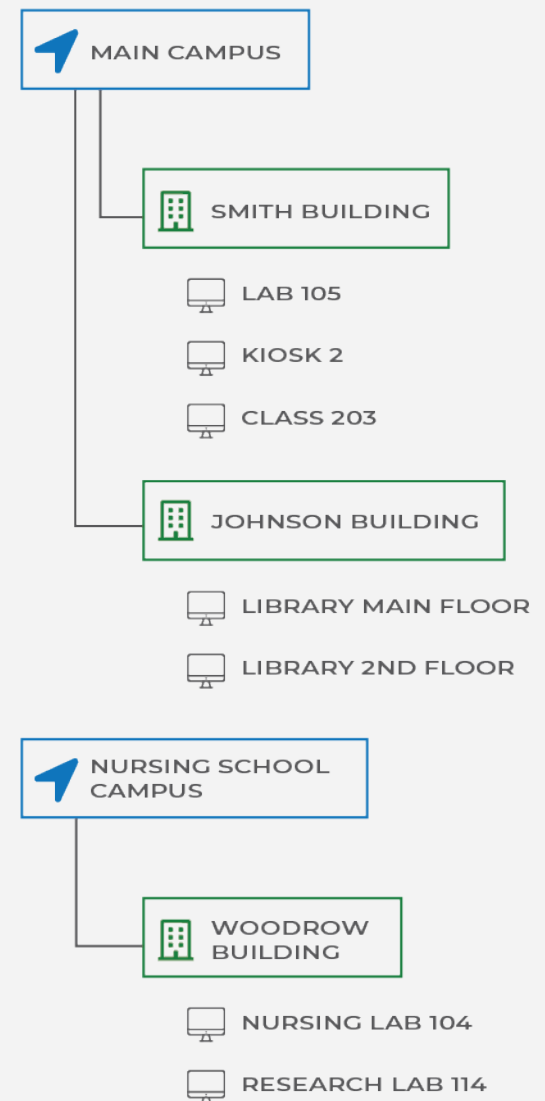

**Advanced:** *Change the way stations in the group are tracked.*

- 4 Click Save.

### NESTING GROUPS

You can nest groups within groups to understand usage across labs, buildings, campuses or all machines.
